

<b>Job Title:</b>	Applications Engineer
<b>Department:</b>	Customer Support
<b>Location:</b>	Belfast, Northern Ireland
<b>Employment Category:</b>	Full-time
<b>Package:</b>	Competitive plus share options
<b>Company Overview:</b>	<p>WFS Technologies is the world's leading supplier of low frequency radio systems for through-water and through-ground wireless communication. The company's innovative products are targeted at oil &amp; gas, environmental, consumer and defence markets.</p> <p>WFS is seeking an applications engineer to join the team at our office in Belfast.</p>

### **JOB SUMMARY**

The applications engineer is responsible for integration of our products with customer systems and supporting customer trials. This requires the ability to problem solve, confidence in system integration and the ability to modify software to enhance the configurability of the modems appropriately. Good communication skills and partnership with customers is also essential.

### **RESPONSIBILITIES**

- Support integration of WFS products with customer systems, development of system configuration, control and protocol firmware. Contributing to ongoing technical roadmap process.

### **PERSON SPECIFICATION**

- Someone who thrives in the unconstrained environment of the small company.
- EU citizenship essential.

### **EXPERIENCE**

- Experience of industrial sensors and control systems. Embedded / low-level software development, ideally including datacomms protocols.

### **TECHNICAL SKILLS**

- Essential - C; understanding of communications protocols such as I<sup>2</sup>C, SPI, IP, TCP, UDP.
- Beneficial - Experience of software version control and working in a software team adhering to procedures such as coding conventions, peer review etc.

### **COMPETENCIES**

Effective communicator, both verbal and written.

**To apply, please send a CV and covering letter to: [jobs@wfs-tech.com](mailto:jobs@wfs-tech.com) detailing which position is relevant to your application in the subject line of the email.**
